

SHAINA GONZALES

SENIOR PRODUCT DESIGNER | UX ENGINEER | ENTERPRISE WORKFLOWS | AI PROTOTYPING

(260) 413-9966 | shaina.gonzales@outlook.com | linkedin.com/in/shainag3 | github.com/Gonzasha345-art | shainagonzaledesigns.com | Michigan

PROFESSIONAL PROFILE

Product designer and UX engineer with 7+ years of combined product, UX/UI, web, and software experience, including 3.5 years at General Motors. Designs clear journeys through complex enterprise workflows, from Figma wireframes and interactive prototypes through implementation and design QA. Brings strong product and engineering partnership, reusable interaction patterns, data-rich UX, and practical experience with AI tools including Claude Code.

PRODUCT DESIGN EXPERTISE

Product Design: User Journeys | Workflow Mapping | Wireframes | Figma | High-Fidelity Prototypes | Responsive UX/UI | Interaction Design | Accessibility | Design QA

Complex Systems: Enterprise Products | Administrative Workflows | Dashboards | Data Visualization | Approval Flows | Design Patterns | Reusable Components | APIs

Collaboration & Prototyping: Stakeholder Discovery | Design Reviews | Product and Engineering Partnership | Claude Code | GitHub Copilot | React | Angular | Agile | Mentoring

PROFESSIONAL EXPERIENCE

GENERAL MOTORS | Software Engineer - UX/UI & Design Engineering Focus | Jan 2023 - May 2026 | Michigan

- Led UX/UI design and frontend implementation for enterprise tools, translating complex requirements into Figma flows, wireframes, high-fidelity designs, and responsive interfaces for technical and nontechnical users.
- Mapped and simplified journeys across event scheduling, approvals, network administration, data review, and firewall requests; designed calendars, dashboards, maps, forms, and dense tables that made operational tasks easier to navigate.
- Worked with product stakeholders, users, and engineers to clarify needs, review prototypes and design decisions, and refine solutions against technical constraints and implementation feedback.
- Led design walkthroughs and cross-functional reviews, built agreement around interaction patterns, advocated for accessibility and consistency, and checked implemented screens against the intended experience.
- Designed and contributed to AI-assisted workflows, including conversational help, information retrieval, automation, and recommendations; use Claude Code and GitHub Copilot to explore and build working interface concepts.
- Helped reshape user workflows that reduced manual work and task-completion time by approximately 50%.

SELECTED PRODUCT DESIGN WORK

Broadcasting Services - Led the redesign of a complex event and calendar experience, including administrative approval flows for executive communications and events with 1,000+ attendees. Clarified roles, scheduling states, and handoffs in a high-stakes internal workflow.

ASA - Network Operations - Designed workflows for nodes, groups, objects, IPs, devices, and comparison of multiple data sources with a trusted reference. Organized dense technical information into clear views and reusable interaction patterns.

ISE - Global Infrastructure - Designed and built a global infrastructure experience with location maps, IPs, servers, nodes, clusters, data tables, and create/edit flows. Balanced discovery and decision making with the detail needed by technical users.

ADDITIONAL GENERAL MOTORS WORK

TAD - Firewall Requests - Helped centralize a fragmented request process that historically took up to two months. Shaped the user journey and integrated services, conversational assistance, and automation as the team drove turnaround toward a two-day target.

Gamified Learning Platform - Sole designer and frontend project lead for an employee learning and engagement product with profiles, leaderboards, events, videos, and educational content; translated Figma designs into production Angular/React screens.

AI and Conversational UX - Contributed to an early enterprise chatbot and AI-assisted experiences for guided actions, information retrieval, and workflow support.

FREELANCE UX/UI AND PRODUCT DEVELOPMENT | 2017 - 2023

Client engagements completed during college and before GM; several projects overlapped.

TriNetica - Long-running UX/UI and development engagement. Created wireframes, journey maps, reusable patterns, and Angular interfaces while partnering with project managers, engineers, and stakeholders to turn requirements into usable experiences.

Pin Seekers Golf Club - Designed and built a membership and commerce experience, including branding, website, registration, payments, enrollment, rosters, schedules, and database-backed administration.

Lincoln Financial Group - Contributed to full-stack work across complex databases, API integrations, data pipelines, and operational workflows, bringing an understanding of implementation constraints to product design.

Growing Minds - Led digital design for a nonprofit tutoring organization; designed and built its website, brand materials, and campaign assets around the needs of families and program stakeholders.

All American Petting Zoo - Designed, launched, and maintained a responsive website, refining customer-facing pages and content based on stakeholder needs over a long-running relationship.

DESIGN LEADERSHIP AND COLLABORATION

Stakeholder alignment | Design rationale | Cross-functional reviews | Mentoring | Accessibility advocacy | Reusable patterns | Engineering handoff | Implementation validation

EDUCATION

PURDUE UNIVERSITY | Bachelor's Degree, Graphic Design & Computer Science | 2016 - 2022
